

Aging Moody 7th Edition

Presenting current research in an innovative format, *Aging: Concepts and Controversies* encourages students to become involved and take an informed stand on the major aging issues that we face as a society. Leading author and active expert in gerontology Rick Moody provides thorough explanation of the issues in the Concepts sections and current research in the Controversy sections, demonstrating the close link between concepts and controversies in these broad areas of aging: health care, socioeconomic trends, and the life course.

The booming increase of the senior population has become a social phenomenon and a challenge to our societies, and technological advances have undoubtedly contributed to improve the lives of elderly citizens in numerous aspects. In current debates on technology, however, the »human factor« is often largely ignored. The ageing individual is rather seen as a malfunctioning machine whose deficiencies must be diagnosed or as a set of limitations to be overcome by means of technological devices. This volume aims at focusing on the perspective of human beings deriving from the development and use of technology: this change of perspective - taking the human being and not technology first - may help us to become more sensitive to the ambivalences involved in the interaction between humans and technology, as well as to adapt technologies to the people that created the need for its existence, thus contributing to improve the quality of life of senior citizens.

Aging populations are a major consideration for socio-economic development in the early 21st century. This demographic change is mainly seen as a threat rather than as an opportunity to improve the quality of human life. Aging population is taking place in every continent of the world with Europe in the least favourable situation due to its aging population and reduction in economic competitiveness. Economic Foundations for Creative Aging Policy offers public policy ideas to construct positive answers for ageing populations. This exciting new volume searches for economic solutions that can enable effective social policy concerning the elderly. Klimczuk covers theoretical analysis and case study descriptions of good practices, to suggest strategies that could be internationally popularised.

"Aldwin and Gilmer have supplied an interesting textual model for examining health, illness, and aging. Their homogenized approach to aging research is refreshing and insightful."--*Anthropology and Aging Quarterly* "Clearly written at a level for college students, this is an excellent resource on aging...Highly recommended.--*Choice: Current Reviews for Academic Libraries* Spanning the biological and psychosocial aspects of aging, this upper-level undergraduate and graduate text integrates current findings in biology, psychology, and the social sciences to provide comprehensive, multidisciplinary coverage of the aging process. This new edition incorporates the tremendous amount of research that has come to light since the first edition was published. From a physical perspective, the text examines age-related changes and disease-related processes, the demography of the aging population, aging theories, and how to promote optimal aging. Coverage of the psychosocial aspects of aging encompasses mental health, stress and coping, spirituality, and caregiving in later years. The authors address demographic, theoretical, and methodological issues on aging, including a worldwide overview of aging demographics. The book reviews biological and psychosocial theories and offers much-needed information on longitudinal design and statistics as they relate to aging research. It discusses the aging of the major organ systems, the brain and sensory systems, and the endocrine and immune systems; basic anatomy and physiology; normal, impaired, and optimal aging; and functional health. Psychosocial factors that affect health are addressed, including the interplay between physical health and mental health, stress, coping, and social support. The text also covers current issues in social gerontology, including such promising new trends as gerontechnology and Green Houses, and provides information on health promotion programs. New to the Second Edition: Information involving retirement, volunteer opportunities, housing, and adaptation to health changes Coverage of economics and aging, including information on social security and other retirement income and the future of Medicare and Medicaid Significant new information about the regulatory systems Revised and updated chapters on death and dying and optimal aging Discussions on two models of optimal aging and valuable tips for its promotion URLs to relevant websites for additional information
Aging Concepts and Controversies SAGE Publications, Incorporated

As the field of aging and gerontology grows worldwide, this exciting guide introduces students to key issues and concepts. It covers topics related to the phenomena of advancing aging, including how older age has been defined historically, cultural myths related to advanced age, health and function in later life, how older age is financed throughout the world, and other key questions. Taking a multiple-perspective approach (including humanities, social and behavioral sciences and policy studies), the book's features include further reading for each chapter, a glossary of key terms, and tables that provide easy reference points.

Sociology, Work and Organisation builds on the five popular and successful editions of *Sociology, Work and Industry*. The new text is outstanding in how effectively it explains the value of using the sociological imagination to understand the nature of institutions of work, organisations, occupations, management and employment and how they are changing in the 21st century. The book combines intellectual depth with accessible language and a user-friendly layout. It is unrivalled in the breadth of its coverage and its authoritative overview of both traditional and emergent themes in the sociological study of work and organisation. It explains the basic logic of the sociological analysis of work and the way work is organised, whilst also providing an appreciation of the different theoretical traditions which the subject draws upon. It fully considers: the direction and implication of trends in technological change, globalisation, labour markets, work organisation, managerial practices and employment relations the extent to which these trends are intimately related to changing patterns of inequality in modern societies and to the changing experiences of individuals and families the ways in which workers challenge, resist and make their own contributions to the patterning of work and shaping of work institutions. Key features include: a new sign-posting system which integrates material and brings out themes which run through the various chapters; 'key issue' guides and summaries with each chapter; and the identifying of key concepts throughout the book, which are then brought together in an unrivalled glossary and concept guide at the end.

Winner of the 2017 Newbery Award The New York Times Bestseller An Entertainment Weekly Best Middle Grade Book of 2016 A New York Public Library Best Book of 2016 A Chicago Public Library Best Book of 2016 An Amazon Top 20 Best Book of 2016 A Publishers Weekly Best Book of 2016 A School Library Journal Best Book of 2016 Named to Kirkus Reviews' Best Books of 2016 2017 Booklist Youth Editors' Choice Every year, the people of the Protectorate leave a baby as an offering to the witch who lives in the forest. They hope this sacrifice will keep her from terrorizing their town. But the witch in the Forest, Xan, is kind. She shares her home with a wise Swamp Monster and a Perfectly Tiny Dragon. Xan rescues the children and delivers them to welcoming families on the other side of the forest, nourishing the babies with starlight on the journey. One year, Xan accidentally feeds a baby moonlight instead of starlight, filling the ordinary child with extraordinary magic. Xan decides she must raise this girl, whom she calls Luna, as her own. As Luna's thirteenth birthday approaches, her magic begins to emerge--with dangerous consequences. Meanwhile, a young man from the Protectorate is determined to free his people by killing the witch. Deadly birds with uncertain intentions flock nearby. A volcano, quiet for centuries, rumbles just beneath the earth's surface. And the woman with the Tiger's heart is on the prowl . . .

Success depends on the ability to think critically. Training and practice turn this ability into a powerful skill. *BECOMING A CRITICAL THINKER* gives you the opportunity to develop this skill in a classroom environment while stressing its application to daily life. You'll learn to solve everyday problems, maintain successful relationships, make career choices, and interpret the messages of advertising in a variety of media. Exercises throughout the text encourage you to practice what you read and to apply it to your own life. *BECOMING A CRITICAL THINKER* breaks up critical thinking into a series of cumulative activities, a unique approach that has made this text a staple of many critical thinking courses. ebook version.

This book provides a current perspective on alcohol and aging to better understand the trends, costs, benefits, and clinical and community evidenced-based strategies. This book embraces not only the physical, cognitive, psychological, and social health benefits of moderate drinking in the elderly, it also delves into the risks of excessive drinking, including physical and psychiatric morbidity, neurodegeneration, medication complications, and accidents and injuries, and loss of independence. Written by experts in the field, this book is the only current text that includes the most current scientific, research, empirical, and practice information alongside a comprehensive review of the status of the field that will help guide alcohol use management and stimulate future research. Alcohol and Aging is the ultimate resource for all researchers, educators, clinicians, and professionals working with older adults who drink.

In recent decades, the North American public has pursued an inspirational vision of successful aging—striving through medical technique and individual effort to eradicate the declines, vulnerabilities, and dependencies previously commonly associated with old age. On the face of it, this bold new vision of successful, healthy, and active aging is highly appealing. But it also rests on a deep cultural discomfort with aging and being old. The contributors to Successful Aging as a Contemporary Obsession explore how the successful aging movement is playing out across five continents. Their chapters investigate a variety of people, including Catholic nuns in the United States; Hindu ashram dwellers; older American women seeking plastic surgery; aging African-American lesbians and gay men in the District of Columbia; Chicago home health care workers and their aging clients; Mexican men foregoing Viagra; dementia and Alzheimer sufferers in the United States and Brazil; and aging policies in Denmark, Poland, India, China, Japan, and Uganda. This book offers a fresh look at a major cultural and public health movement of our time, questioning what has become for many a taken-for-granted goal—aging in a way that almost denies aging itself. This book provides an evidence-based approach for helping older adults maintain healthy lifestyles, adapt to normal age-related changes, and manage acute and chronic illnesses. This text, divided into chronic illness both physical and emotional, covers only the most common illnesses of older adults and incorporates the holistic framework that comprises geriatric care in partnership with physicians, gerontologists and nurses.

Handbook of the Psychology of Aging, Eighth Edition, tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span. The psychology of aging is important to many features of daily life, from workplace and the family, to public policy matters. It is complex, and new questions are continually raised about how behavior changes with age. Providing perspectives on the behavioral science of aging for diverse disciplines, the handbook explains how the role of behavior is organized and how it changes over time. Along with parallel advances in research methodology, it explicates in great detail patterns and sub-patterns of behavior over the lifespan, and how they are affected by biological, health, and social interactions. New topics to the eighth edition include preclinical neuropathology, audition and language comprehension in adult aging, cognitive interventions and neural processes, social interrelations, age differences in the connection of mood and cognition, cross-cultural issues, financial decision-making and capacity, technology, gaming, social networking, and more. Tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span Covers the key areas in psychological gerontology research in one volume Explains how the role of behavior is organized and how it changes over time Completely revised from the previous edition New chapter on gender and aging process

This unique book provides a broad, comprehensive examination of the experience of disability. Its content focuses on definitions of disability, societal response to people with disabilities, and the experience of disability from the perspectives of individuals with a disability and society. It is organized around broad themes as opposed to disability categories. With an engaging writing style and completely updated extensive references, DISABILITY, SOCIETY, and the Individual prepares the reader to understand and be able to use complex, important, and new ideas surrounding disability - its experience and its social and cultural context. The text includes discussion questions, learning activities, suggested readings, and first-person accounts.

Social Work with Older Adults, Third Edition, provides a comprehensive overview of the process of assessing the needs of older adults and providing social and mental health services to meet those needs. The Third Edition of this award-winning text examines the basics of biopsychosocial changes associated with the aging process. Students are introduced to theories on the biopsychosocial functioning of older adults and are taught how to assess that functioning and plan and implement interventions from a social work perspective. The book includes content on abuse and neglect of older adults, drug and alcohol abuse and the social worker's role in dying, bereavement, and advance directives.

A compassionate guide for transforming aging into spiritual growth • Engage with 25 key questions guiding you to mine previously untapped veins of inspiration and courage • Find a constructive role for regret and fear and embrace the freedom to become more fully yourself • Draw from both Eastern and Western spiritual traditions and the latest research in psychological and religious theory to cultivate your spiritual potential As we enter the years beyond midlife, our quest for an approach to aging takes on added urgency and becomes even more relevant in our daily lives. Empowering a new generation of seekers to view aging as a spiritual path, authors Robert Weber and Carol Orsborn reveal that it is by engaging with the difficult questions about loss, meaning, and mortality--questions we can no longer put off or ignore--that we continue to grow. In fact, the realization of our full spiritual potential comes about not by avoiding the challenges aging brings our way but by working through them. Addressing head-on how to make the transition from fears about aging into a fuller, richer appreciation of the next phase of our lives, the authors guide you through 25 key questions that can help you embrace the shadow side of aging as well as the spiritual opportunities inherent in growing older. Sharing their stories and wisdom to both teach and demonstrate what it means to feel energized about the possibilities of your later years, they explore how to find a constructive role for regret, shame, and guilt, realize your value to society, and embrace the freedom of your later years to become more fully yourself. Coming from Catholic Jesuit and Jewish backgrounds respectively, as well as drawing from the latest research in psychological and religious theory, Weber and Orsborn provide their own conversational and candid answers to the 25 key questions, supporting their insightful and compassionate guidance with anecdotes, inspirational readings, and spiritual exercises. By engaging deeply with both the shadow and light sides of aging, our spirits not only learn to cope--but also to soar.

The first wave of 76 million 'Baby Boomers,' representing 28 percent of the American population, turns 65 in 2011 and they will live longer than any previous generation in history – at least 15 years more than their parents! – creating an entirely new stage of human life.

John Robinson presents the compelling journey from youth to middle age in this study of the spiritual and psychological realities of male midlife.

Opportunities and optimism in Aging. Issues in Aging, 3rd edition takes an optimistic view of aging and human potential in later life. This book presents the most up-to-date facts on aging today, the issues raised by these facts, and the societal and individual responses that will create a successful old age for us all. Mark Novak presents the full picture of aging--exhibiting both the problems and the opportunities that accompany older age. The text illustrates how generations are dependent on one another and how social conditions affect both the individual and social institutions. Learning Goals -Upon completing this book, readers will be able to: -Understand how large-scale social issues--social attitudes, the study of aging, and demographic issues--affect individuals and social institutions -Identify the political responses to aging and how individuals can create a better old age for themselves and the people they know -Separate the myths from the realities of aging -Recognize the human side of aging -Trace the transformation of pension plans, health, and opportunities for personal expression and social

engagement to the new ecology of aging today

Pocket Guide for the Home Care Aide is the perfect everyday reference when working with patients in their homes. It serves as a resource to address the unique needs of the home care aide as an integral part of the home care organization. The pocket guide provides an overview of the essential elements of orientation for the home health aide, as well as self analysis and development tools. It provides procedures for basic home health aide skills and gives information about the most common home health diagnoses.

For undergraduate or graduate courses that include planning, conducting, and evaluating research. A do-it-yourself, understand-it-yourself manual designed to help students understand the fundamental structure of research and the methodical process that leads to valid, reliable results. Written in uncommonly engaging and elegant prose, this text guides the reader, step-by-step, from the selection of a problem, through the process of conducting authentic research, to the preparation of a completed report, with practical suggestions based on a solid theoretical framework and sound pedagogy. Suitable as the core text in any introductory research course or even for self-instruction, this text will show students two things: 1) that quality research demands planning and design; and, 2) how their own research projects can be executed effectively and professionally.

Fitness Professional's Handbook, Seventh Edition, provides current and future fitness professionals with the knowledge to screen participants, conduct standardized fitness tests, evaluate the major components of fitness, and prescribe appropriate exercise.

"The eighth edition of Aging Networks is particularly well-suited for use in the classroom, and can be used or adapted for a wide variety of disciplines including gerontology, social work, public health, public administration, nursing and other health professions... This small volume is not only an excellent learning tool, but also a must-have handbook for aging professionals in many fields." --Noreen A. Shugrue Research Associate, University of Connecticut Center on Aging Farmington, CT Educational Gerontology As our population ages, the need for comprehensive, up-to-date knowledge about aging services in the United States becomes more and more crucial. This highly accessible and concise text about such resources provides students and practitioners of gerontology along with all professionals whose work concerns the well-being of older adults with a current, detailed description and analysis of federal, state, local, and global programs and services for older people with or without cognitive, physical, and social needs. Thoroughly updated to encompass the new information available concerning later life, it reflects critical changes to legislation, health care, and current trends, and focuses on the strengths of older adults, their diversity, and the role our multilayered aging network plays in advocacy, community independence, and engagement. Commentary and critical thinking challenges from policymakers, program directors, and educators facilitate high-level thinking and independent analysis of the aging networks, past, present, and future. The eighth edition underscores recent policy changes and how these changes will impact the lives of older adults. "Perspectives" boxes throughout the text highlight complex themes addressed by experts, and "Critical Thinking" topics and questions encourage reflection and discussion. The new edition also describes initiatives that highlight best-practice approaches and model projects designed to facilitate positive change. Along with a vast amount of new and revised information reinforced with a variety of perspectives in historical and current contexts, the book features an international perspective highlighting the collaborative efforts driving many aspects of aging network programming. Additionally, the book focuses on the unique issues of the lesbian, gay, bisexual, and transgender (LGBT) population along with programs designed to address them. NEW TO THE EIGHTH EDITION: Expert analyses and insights into complex themes Reflects reorganization of the aging network under the Administration for Community Living, and policy changes affecting practice International perspectives such as the World Health Organization's Age-Friendly Cities Project Innovative and model projects and programs Expanded focus on issues unique to the LGBT population The influence of social determinants on older adults and the aging networks Caregiving issues Disaster and emergency preparedness Effects of economic downturn on the aging population Elder mistreatment Changes in employment and retirement patterns Supporting "aging in place" New and expanded educator's ancillary packet

A critical resource for anyone who wants to help women with the pressure, frustrations, and trauma they face. Women today often have sources of tremendous pain in their lives including infertility, divorce, domestic violence, eating disorders, and more. If you want to be better equipped to help women in pain, this book was written for you. It teaches you: What women in pain want to know from you How you can be there for them What their community needs to do. The first section is written by Dr. Bev Hislop to help you understand the core needs of women in pain. The rest of the chapters are written by experts on those specific issues. A remarkable blend of expertise and empathy, *Shepherding Women in Pain* is a perfect resource for pastors, church staff, and women's ministry leaders who want to help women in pain experience Jesus, joy, and wholeness again.

The number one guide to corporate valuation is back and better than ever Thoroughly revised and expanded to reflect business conditions in today's volatile global economy, *Valuation, Fifth Edition* continues the tradition of its bestselling predecessors by providing up-to-date insights and practical advice on how to create, manage, and measure the value of an organization. Along with all new case studies that illustrate how valuation techniques and principles are applied in real-world situations, this comprehensive guide has been updated to reflect new developments in corporate finance, changes in accounting rules, and an enhanced global perspective. *Valuation, Fifth Edition* is filled with expert guidance that managers at all levels, investors, and students can use to enhance their understanding of this important discipline. Contains strategies for multi-business valuation and valuation for corporate restructuring, mergers, and acquisitions Addresses how you can interpret the results of a valuation in light of a company's competitive situation Also available: a book plus CD-ROM package (978-0-470-42469-8) as well as a stand-alone CD-ROM (978-0-470-42457-7) containing an interactive valuation DCF model *Valuation, Fifth Edition* stands alone in this field with its reputation of quality and consistency. If you want to hone your valuation skills today and improve them for years to come, look no further than this book.

This thoroughly revised edition of Mooney, Knox, and Schacht's text uses a theoretically balanced, student-centered approach to provide a comprehensive exploration of social problems. *UNDERSTANDING SOCIAL PROBLEMS, Tenth Edition*, progresses from a micro to macro level of analysis, focusing first on problems related to health care, drugs and alcohols, families, and crime, and then broadening to the larger issues of poverty and inequality, population growth, aging, environmental problems, and conflict around the world. The social problem in each chapter is framed in a global as well as a U.S. context. In addition, the three major theoretical perspectives are applied to the problem under discussion, and its consequences -- as well as alternative solutions -- are explored. Pedagogical features such as *The Human Side* and *Self and Society* enable students to grasp how social problems affect the lives of individuals and apply their understanding of social problems to their own lives. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

What am I going to do with my retirement? People talk about retirement like it's supposed to be an endless vacation. But what if, like the majority of those facing retirement, you can't afford such a luxury? Or, what if you just want something more from retirement? Some advocate for no retirement at all. But you've worked for decades and a rest and reprieve do sound appealing. What should you do? Does God have a purpose for your retirement? Yes, He does. Learn how to discern what it is by taking an uncommon approach. Jeff Haanen looks biblically and practically at the need for rest and purpose in retirement. And teaches you how to: Take a sabbatical rest in early retirement Listen to God's voice for their calling in retirement Rethink "work" in retirement

Understand family systems and leaving a legacy Planning retirement doesn't have to be distressing. Retire in a way that's God-honoring, purpose-filled, restful, and truly biblical.

The Handbook of the Psychology of Aging, Seventh Edition, provides a basic reference source on the behavioral processes of aging for researchers, graduate students, and professionals. It also provides perspectives on the behavioral science of aging for researchers and professionals from other disciplines. The book is organized into four parts. Part 1 reviews key methodological and analytical issues in aging research. It examines some of the major historical influences that might provide explanatory mechanisms for a better understanding of cohort and period differences in psychological aging processes. Part 2 includes chapters that discuss the basics and nuances of executive function; the history of the morphometric research on normal brain aging; and the neural changes that occur in the brain with aging. Part 3 deals with the social and health aspects of aging. It covers the beliefs that individuals have about how much they can control various outcomes in their life; the impact of stress on health and aging; and the interrelationships between health disparities, social class, and aging. Part 4 discusses the emotional aspects of aging; family caregiving; and mental disorders and legal capacities in older adults. Contains all the main areas of psychological gerontological research in one volume Entire section on neuroscience and aging Begins with a section on theory and methods Edited by one of the father of gerontology (Schaie) and contributors represent top scholars in gerontology

Ageing populations are a major consideration for socio-economic development in the early twenty-first century. This demographic change is mainly seen as a threat rather than as an opportunity to improve the quality of human life, especially in Europe, where ageing has resulted in a reduction in economic competitiveness. Economic Foundations for Creative Ageing Policy mixes the silver economy, the creative economy, and the social economy to construct positive solutions for an ageing population. Klimczuk covers theoretical analyses and case study descriptions of good practices to suggest strategies that could be internationally popularized. This classic text, now in its fifth edition, is distinguished by its emphasis on social context, social processes, and social structures as part of a broader understanding of the sociology of aging and the life course. Presenting an objective view of the realities of aging both positive and negative, the book examines aging from micro/macro, personal, community, societal, and global perspectives. This fifth edition describes important changes in the field of social gerontology and growth in such topics as diversity, global aging, and the life course. It addresses major shifts in public policy, social institutions, and aging-related programming initiatives. There is a strong focus on the changing landscape of aging, particularly in regard to social engagement, employment and lifelong learning, enhanced health and independence, and livable communities for people of all ages. Additionally, the book includes new information on the Affordable Care Act, and end-of-life issues.

Comprehension of the theories of aging requires rudimentary knowledge of oxidation and reduction reactions, protein function, cell organelles, mitosis, acquired immunity, and evolution, among other basic biological concepts. Without these fundamentals, students of biological aging struggle to learn the essentials of biological aging and how to appreciate the research advances in the field. Human Biological Aging: From Macromolecules To Organ-Systems is an introduction to human aging from the level of macromolecules to organ systems. Age changes in proteins, DNA, polysaccharides and lipids are discussed relative to known age-related alterations in structure and function produced by free radicals and oxidants. At the cellular level, age-dependent mechanisms that diminish organelle function are described. Cellular phenomena of replicative senescence apoptosis, autophagy and neuroplasticity are detailed as to their contribution to compromised cellular functions. Authored by a leader in the field, Human Biological Aging: From Macromolecules To Organ-Systems is an invaluable introduction for those studying human aging.

- Offers shadow-work and many diverse spiritual practices to help you break through denial to awareness, move from self-rejection to self-acceptance, repair the past to be fully present, and allow mortality to be a teacher
- Reveals how to use inner work to uncover and explore the unconscious denial and resistance that erupts around key thresholds of later life
- Includes personal interviews with prominent Elders, including Ken Wilber, Krishna Das, Fr. Thomas Keating, Anna Douglas, James Hollis, Rabbi Rami Shapiro, Ashton Applewhite, Roshi Wendy Nakao, Roger Walsh, and Stanislav Grof

With extended longevity comes the opportunity for extended personal growth and spiritual development. You now have the chance to become an Elder, to leave behind past roles, shift from work in the outer world to inner work with the soul, and become authentically who you are. This book is a guide to help get past the inner obstacles and embrace the hidden spiritual gifts of age. Offering a radical reimagining of age for all generations, psychotherapist and bestselling author Connie Zweig reveals how to use inner work to uncover and explore the unconscious denial and resistance that erupts around key thresholds of later life, attune to your soul's longing, and emerge renewed as an Elder filled with vitality and purpose. She explores the obstacles encountered in the transition to wise Elder and offers psychological shadow-work and diverse spiritual practices to help you break through denial to awareness, move from self-rejection to self-acceptance, repair the past to be fully present, reclaim your creativity, and allow mortality to be a teacher. Sharing contemplative practices for selfreflection, she also reveals how to discover ways to share your talents and wisdom to become a force for change in the lives of others. Woven throughout with wisdom from prominent Elders, including Ken Wilber, Krishna Das, Father Thomas Keating, Anna Douglas, James Hollis, Rabbi Rami Shapiro, Ashton Applewhite, Roshi Wendy Egyoku Nakao, Roger Walsh, and Stanislav Grof, this book offers tools and guidance to help you let go of past roles, expand your identity, deepen self-knowledge, and move through these life passages to a new stage of awareness, choosing to be fully real, transparent, and free to embrace a fulfilling late life.

Alphabetically arranged and followed by an index of terms at the end, this handy reference of literary terms is bound to be of invaluable assistance to any student of English literature.

THINK Currency. THINK Issues. THINK Relevancy. THINK Sociology. With an engaging visual design and just 15 chapters, THINK Sociology is the Australian Sociology text your students will want to read. This text thinks their thoughts, speaks their language, grapples with the current-day problems they face, and grounds sociology in real world experiences. THINK Sociology is informed with the latest research and the most contemporary examples, allowing you to bring current events directly into your unit with little additional work.

Two decades ago the poet Robert Bly published a book that stayed on the New York Times Bestseller list for sixty-two weeks and changed a generation of men. Based on an ancient fairy tale, Iron John became an allegory for midlife men in search of an authentic life. I was part of the men s movement launched by this poet and the book I wrote at that time, Death of a Hero, Birth of the Soul, became one of its bibles. This same army of 38 million men is now marching into their retirement years largely unprepared for what aging really entails or what to do with the next twenty-five years of unprecedented longevity gifted them by science and medicine. Boomers, of course, believe that they will conquer this stage with exercise, attitude, and nutrition. As their

problems and defeats multiply, however, aging men and I am one of them now discover that they are lost once again in an unknown land longing for another great story to guide them home. I have found that story.

With our unprecedented longevity, aging has become a new developmental stage in the human life cycle. Conscious sacred aging now offers humanity profound opportunities for psychological, spiritual and mystical transformation, expanding not only our lifespan but our awareness of God as well. What if we discover in this awakening that we are already divine? What if this realization transforms our very nature and purpose in the world? The Divine Human answers these questions and more, revealing the ultimate meaning of the New Aging.

Makes explicit the connection between coursework and field placement, and elucidates how the policies which the government legislates affect the elderly.

Praise for the Eighth Edition: "This small volume is not only an excellent learning tool, but also a "must-have" handbook for aging professionals in many fields." -Noreen A. Shugrue Research Associate, University of Connecticut Center on Aging Farmington, CT Educational Gerontology This classic text—more relevant than ever as our population rapidly ages—delivers comprehensive and up-to-date knowledge about aging services in the U.S. Written for both students and practitioners of gerontology, along with all professionals involved in the well-being of older adults, this highly accessible book provides a current and detailed description and analysis of local to global services for older people with or without cognitive, physical, or social needs. The Ninth Edition is updated to reflect critical changes to legislation, health care, and recent trends. It focuses on the strengths and diversity of older adults and the role our multilayered aging networks play in advocacy, community independence, and engagement. Commentary and critical thinking challenges from policymakers, program directors, and educators facilitate high-level reasoning and independent analysis of aging networks past, present, and future. The ninth edition also offers enhanced resources including a Test Bank, Instructor's Manual, PowerPoint slides, and links to video. Additionally, the print version of the book includes free, searchable, digital access to the entire contents. New to the Ninth Edition: Fully updated to reflect historical context, recent trends and challenges, and future considerations Addresses the effects of our current political and ideological landscape on aging networks including a Call to Action Examines the current status of Medicare and Medicaid, Meals-on-Wheels, and the impact of the ACA Discusses long-term services and supports, disaster preparedness and climate change, caregiving as a human right, and LGBTQ services and support Presents new case studies providing evidence-based best-practice initiatives and new innovations Delivers enhanced instructor resources including Test Bank, Instructor's Manual, Power Point slides, and video links Key Features: Focuses on the strengths of older adults and the role our multilayered aging networks play in advocacy, community independence, and engagement Provides commentary and critical thinking challenges from policy-makers, program directors, and educators to facilitate high-level analysis Addresses changing demographics and future challenges Offers "Voices from the Field" boxes and "Critical Thinking" topics and questions to encourage reflection and discussion

Why Do We Act Like There Is An Age Restriction on Spiritual Growth? For the last several decades, Western churches have focused the bulk of their resources on the early stages of discipleship—children's Sunday school, youth group, college ministry. While these are all important, we have neglected the spiritual growth of those in the second half of life. In fact, an outside observer might think that after the growth of the college years, the goal is simply to coast through the rest of your Christian life. Michelle Van Loon has a different idea. In *Becoming Sage*, she challenges those in midlife and beyond to continue pursuing radical spiritual growth, and she'll help you get started. She explores what the unique challenges of midlife can teach us about Jesus and how to think about everything from church, friends, and family, to money, bodies, and meaning. Don't settle for a life of coasting.

Revitalize your spiritual growth today.

The Aging Consumer: Perspectives from Psychology and Marketing, 2nd edition takes stock of what is known around age and consumer behavior, identifies gaps and open questions within the research, and outlines an agenda for future research. There has been little systematic research done with respect to the most basic questions related to age and consumer behavior, such as whether older adults versus young and middle-age adults respond to marketing activities including pricing, promotions, product design, and distribution. Written by experts, *The Aging Consumer* compiles research on a broad range of topics on consumer marketing, from an individual to a societal level of analysis. This second edition provides new versions of chapters contained in the 2010 volume that have been updated to reflect the latest psychological and marketing research and thinking. Included also are ten new chapters which cover exciting new ground, such as changes in metacognition in older adults, motivated cognition of the aging consumer, and a global perspective on aging and the economy across cultures. This updated volume is beneficial for researchers and practitioners in marketing, consumer behavior, and advertising. Additionally, *The Aging Consumer*, 2nd edition will appeal to professionals in other fields such as psychology, decision sciences, gerontology and gerontological social work, and those who are concerned with normal human aging and its implications for the everyday behavior of older individuals. It will also be of interest to those in fields concerned with the societal implications of an aging population, such as economics, policy, and law.
