Talent is overrated - learn what truly makes you succeed Angela Duckworth's seminal work on why passion and perseverance matter more than anything Why do naturally talented people frequently fail to reach their potential while other far less gifted individuals go on to achieve amazing things? The secret to outstanding achievement is not talent, but a passionate persistence. In other words, grit. MacArthur Genius Award-winning psychologist Angela Duckworth shares fascinating new revelations about who succeeds in life and why. Based on her cutting-edge research, Duckworth shows how many people achieve remarkable things not just by relying on innate natural talent, but by practising what she calls grit. She then offers a Grit Formula to help anyone to become more gritty, focusing on six key factors- hope, effort, precision, passion, ritual and prioritisation. She reveals- - Why people who test high for talent often fail to achieve their potential, and why people who do not test high for talent often "overachieve" what others expect them to do - How grit can be learned, whatever your IQ or circumstances - Why stubbornness is a key characteristic of gritty people - When to be stubborn and when giving up is the grittiest thing you can do - How gritty people found their passion, and you can find yours - How gritty experts practise, and how you can do the same in your own life - What the people who care about you can do to boost your grit when you need it most - How grit is cultivated in the highest-performing sports teams, companies and schools Leaping past cliches such as 'success is all about hard work', *Grit* offers a fresh and motivating way to climb to heights far beyond what natural talent would predict.

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-genius everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their

first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among Grit's most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

"A useful guide for parents or teachers looking for confirmation that passion and persistence matter, and for inspiring models of how to cultivate these important qualities." —The Washington Post In this young readers edition of the instant New York Times bestseller Grit, MacArthur Genius Award-winning professor Angela Duckworth offers insights into who succeeds in life and why the secret to achievement a special blend of passion and persistence she calls "grit." The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit: Passion, Perseverance, and the Science of Success Duckworth shows young people how they can achieve remarkable things not just by relying on natural talent but by practicing a unique form of focused persistence. She also teaches them how to be better at pursuing the small goals that will bring joy into their everyday life. Drawing on her powerful personal story, Duckworth describes how a youth spent smashing through every academic barrier resulted in the hypothesis that the real predictor of success may not be inborn "talent" but a special blend of resilience and single-mindedness. Through her descriptions of field research at venues as various as the National Spelling Bee (where students who score highest on the "Grit Scale" land in the final rounds) to work with Pete Carroll coach of the Seattle Seahawks, who was building the grittiest culture in the NFL, Duckworth shows how "grit" works in the real world. She also passes along insights gleaned from interviews with dozens of high achievers including the New York Times Crossword Editor, the Dean of Admissions at Harvard, and more.

A New York Times bestseller and "a passionate, urgent" (The New Yorker) examination of the growing inequality gap from the bestselling author of Bowling Alone: why fewer Americans today have the opportunity for upward mobility. Central to the very idea of America is the principle that we are a nation of opportunity. But over the last quarter century we have seen a disturbing "opportunity gap" emerge. We Americans have always believed that those who have talent and try hard will succeed, but this central tenet of the American Dream seems no longer true or at the least, much less true than it was. In Our Kids, Robert Putnam offers a personal and authoritative look at this new American crisis, beginning with the example of his high school class of 1959 in Port Clinton, Ohio. The vast majority of those students went on to lives better than those of their parents. But their children and grandchildren have faced diminishing prospects. Putnam tells the tale of lessening opportunity through poignant life stories of rich, middle class, and poor kids from cities and suburbs across the country, brilliantly blended with the latest social-science research. "A truly masterful volume" (Financial Times), Our Kids provides a disturbing account of the American dream that is "thoughtful and persuasive" (The Economist). Our Kids offers a rare combination of individual testimony and rigorous evidence: "No one can finish this book and feel complacent about equal opportunity" (The New York Times Book Review).

"I know that I'll be evaluated in Seattle with wins and losses, as that is the nature of my profession for the last thirty-five years. But our record will not be what motivates me. Years ago I was asked, 'Pete, which is better: winning or competing?' My response was instantaneous: 'Competing. . . because it lasts longer.'" Pete Carroll is one of the most successful coaches in football today. As the head coach at USC, he brought the Trojans back to national prominence, amassing a 97-19 record over nine seasons. Now he shares the championship-winning philosophy that led USC to seven straight Pac-10 titles. This same mind-set and culture will shape his program as he returns to the NFL to coach the Seattle Seahawks. Carroll developed his unique coaching style by trial and error over his career. He learned that you get better results by teaching instead of screaming, and by helping players grow as people, not just on the field. He learned that an upbeat, energetic atmosphere in the locker room can coexist with an unstoppable competitive drive. He learned why you should stop worrying about your opponents, why you should always act as if the whole world is watching, and many other contrarian insights. Carroll shows us how the Win Forever philosophy really works, both in NCAA Division I competition and in the NFL. He reveals how his recruiting strategies, training routines, and game-day rituals preserve a team's culture year after year, during championship seasons and disappointing seasons alike. Win Forever is about more than winning football games; it's about maximizing your potential in every aspect of your life. Carroll has taught business leaders facing tough challenges. He has helped troubled kids on the streets of Los Angeles through his foundation A Better LA. His words are true in any situation: "If you want to win forever, always compete."

Meticulously researched and well written. It will make you think hard about the judgements you make. An essential read for our times.' Kavita Puri, BBC Journalist and author For the first time, behavioural and data scientist, activist and writer Dr Pragya Agarwal unravels the way our implicit or 'unintentional' biases affect the way we communicate and perceive the world, how they affect our decision-making, and how they reinforce and perpetuate systemic and structural inequalities. Sway is a thoroughly researched and comprehensive look at unconscious bias and how it impacts day-to-day life, from job interviews to romantic relationships to saving for retirement. It covers a huge number of sensitive topics - sexism, racism, ageism, homophobia, colourism - with tact, and combines statistics with stories to paint a fuller picture and enhance understanding. Throughout, Pragya clearly delineates theories with a solid grounding in science, answering questions such as: do our roots for prejudice lie in our

evolutionary past? What happens in our brains when we are biased? How has bias affected technology? If we don't know about it, are we really responsible for it? At a time when partisan political ideologies are taking centre stage, and we struggle to make sense of who we are and who we want to be, it is crucial that we understand why we act the way we do. This book will enable us to open our eyes to our own biases in a scientific and non-judgmental way.

What does it take for women to succeed in a male-dominated world? *The Grit Factor*. At age nineteen, Shannon Huffman Polson became the youngest woman ever to climb Denali, the highest mountain in North America. She went on to reach the summits of Mt. Rainier and Mt. Kilimanjaro and spent more than a decade traveling the world. Yet it was during her experience serving as one of the Army's first female attack helicopter pilots, and eventually leading an Apache flight platoon on deployment to Bosnia-Herzegovina, that she learned the lessons of leadership that forever changed her life. Where did these insights come from? From her own crucibles of experience—and from other women. In writing *The Grit Factor*, Polson made it her mission to connect with an elite pack of tough, impressive female iconoclasts who shared with her their candid stories of combat and career. This slate of decorated leaders includes Heather Penney, one of the first female F-16 pilots, who was put on a suicide mission for 9/11; General Ann Dunwoody, the first female four-star general in the Army; Amy McGrath, the first female Marine to fly the F/A-18 in combat and a 2020 candidate for the US Senate—and dozens of other unstoppable women who got there first, including Polson herself. These women led at the highest levels in the most complicated, challenging, and male-dominated organization in the world. Now, in the post-#MeToo era, when positive role models of women leading are needed as never before, Polson brings these voices together, sharing her own life lessons and theirs with storytelling flair, keen insight, and incisive analysis of current research. With its gripping narrative and relatable takeaways, *The Grit Factor* is both inspiring and pragmatic, a book that will energize and enlighten current and aspiring leaders everywhere—whether male or female.

During the brutal crucible of Navy SEAL training, instructors often tell students to "embrace the suck." This phrase conveys the one lesson that is vital for any SEAL hopeful to learn: lean into the suffering and get comfortable being very uncomfortable. In this powerful, no-nonsense guide, Navy SEAL combat veteran turned leadership expert Brent Gleeson teaches you how to transform every area of your life--the Navy SEAL way. Can anyone develop this level of resilience? Gleeson breaks it down to a Challenge-Commitment-Control mindset. Next, they have a strong emotional Commitment to their goals and are not easily distracted or deterred. Finally, resilient people focus their energy on the things within their Control, rather than fixating on factors they can't impact. *Embrace the Suck* provides an actionable roadmap that empowers you to expand your comfort zone to live a more fulfilling, purpose-driven life. Through candid storytelling, behavioral science research, and plenty of self-deprecating humor, Gleeson shows you how to use pain as a pathway, reassess your values, remove temptation, build discipline, suffer with purpose, fail successfully, transform your mind, and achieve more of the goals you set

"Drop the flashcards—grit, character, and curiosity matter even more than cognitive skills. A persuasive wake-up call."—People Why do some children succeed while others fail? The story we usually tell about childhood and success is the one about intelligence: success comes to those who score highest on tests, from preschool admissions to SATs. But in *How Children Succeed*, Paul Tough argues that the qualities that matter more have to do with character: skills like perseverance, curiosity, optimism, and self-control. *How Children Succeed* introduces us to a new generation of researchers and educators, who, for the first time, are using the tools of science to peel back the mysteries of character. Through their stories—and the stories of the children they are trying to help—Tough reveals how this new knowledge can transform young people's lives. He uncovers the surprising ways in which parents do—and do not—prepare their children for adulthood. And he provides us with new insights into how to improve the lives of children growing up in poverty. This provocative and profoundly hopeful book will not only inspire and engage readers, it will also change our understanding of childhood itself. "Illuminates the extremes of American childhood: for rich kids, a safety net drawn so tight it's a harness; for poor kids, almost nothing to break their fall."—New York Times "I learned so much reading this book and I came away full of hope about how we can make life better for all kinds of kids."—Slate

The updated edition of the bestselling book that has changed millions of lives with its insights into the growth mindset "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, GatesNotes After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 500 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Is true greatness obtainable from everyday means and everyday genes? Conventional wisdom says no, that a lucky few are simply born with certain gifts. The new science of human potential suggests otherwise. Forget everything you think you know about genes, talent, and intelligence, and take a look at the amazing new evidence. Here, interweaving cutting-edge research from numerous scientific fields, David Shenk offers a new view of human potential, giving readers more of a sense of ownership over their accomplishments, and freeing parents from the bonds of genetic determinism. As Shenk points out, our genes are not a "blueprint" that dictate individual destinies. Rather we are all the product of interplay between genes and outside stimuli—a dynamic that we can influence. It is a revolutionary and life-changing message.

A fun and engaging workbook to help kids ages 6-12 build resilience, perseverance, and a growth mindset As a parent, you want to give your child a solid foundation for living a happy, successful life. But if you have a child who is easily sidelined by obstacles, has trouble bouncing back from setbacks, who melts down easily, or gives up quickly when things get tough—you may worry about their ability to succeed in our competitive, high-pressure world. So, how can you help your child develop grit—a trait that embodies tenacity and self-control? Fortunately, grit can be learned. The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

"Have you ever found yourself stretched too thin? Do you simultaneously feel overworked and underutilized? Are you often busy but not productive? Do you feel your time is constantly being hijacked by other people's agendas? If you answered yes to any of these questions, the way out is the way of the Essentialist. Essentialism isn't about getting more done in less time. It's about getting only the right things done. Only once we discern what is absolutely essential and eliminate everything else can we make our highest possible contribution toward things that truly matter. By forcing us to apply more selective criteria for where to spend our precious time and energy, the disciplined pursuit of less empowers us to reclaim control of our own choices, instead of giving others the implicit permission to choose for us. Essentialism is not one more thing to do. It's a whole new way of doing less, but better, in every area of our lives"--Back cover.

'Governments around the world are using behavioural insights to help people achieve their goals. This great new book shows how you can use the same tools in your own life. Go nudge yourself!' - Richard Thaler, winner of the 2017 Nobel Prize in Economics A simple and accessible plan for success, based on seven scientifically tested steps that really work. We're often told to dream big, the sky's the limit and that nothing is impossible. While it is undoubtedly good advice to set yourself goals that have the potential to make you and those around you healthier and happier, how to reach those goals is often less clear. From getting fit or securing a new job to becoming a better manager or parent, simply setting your mind to something will rarely get you where you want to be, and big plans can quickly become overwhelming, leaving us feeling as though we've failed. Most of us set goals with very good intentions, so why do our best-laid plans so often go awry? When we're so committed to making positive changes and fulfilling our ambition at the outset, is there a way of avoiding the common roadblocks that stand between our goals and us? Thankfully, the answer is yes - and it's much easier to achieve than you might think. Working inside the world's first Nudge Unit, Owin Service and Rory Gallagher know the huge impact that small changes and clear plans, based on a scientific understanding of human behaviour, can have from an individual to an international level. For the first time, Think Smalltakes these successful approaches and translates them into an easy, simple framework that has the potential to make a big difference to all our lives.

The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In Decisive, Chip Heath and Dan Heath, the bestselling authors of Made to Stick and Switch, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In Decisive, the Heath brothers, drawing on extensive studies, stories and research, offer specific, practical tools that can help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.

The bestselling author of *UnSelfie* explains why the old markers of accomplishment (grades, test scores) are no longer reliable predictors of success in the 21st century -- and offers 7 teachable traits that will safeguard our kids for the future. Michele Borba has been a teacher, educational consultant, and parent for 40 years -- and she's never been more worried than she is about this current generation of kids. The high-achieving students she talks with every day are more accomplished, better educated, and more privileged than ever before. They're also more stressed, unhappier, and struggling with anxiety, depression, and burnout at younger and younger ages -- "we're like pretty packages with nothing inside," said one young teen. Thrivers are different: they flourish in our fast-paced, digital-driven, often uncertain world. Why? Dr. Borba combed scientific studies on resilience, spoke to dozens of researchers/experts in the field and interviewed more than 100 young people from all walks of life, and she found something surprising: the difference between those who struggle and those who succeed comes down not to grades or test scores, but to seven character traits that set Thrivers apart (and set them up for happiness and greater accomplishment later in life). These traits--confidence, empathy, self-control, integrity, curiosity, perseverance, and optimism--will allow kids to roll with the punches and succeed in life. And the even better news: these traits can be taught to children at any age...in fact, parents and educators must do so. In *Thrivers*, Dr. Borba offers practical, actionable ways to develop these traits in children from preschool through high school, showing how to teach kids how to cope today so they can thrive tomorrow.
