

La Presunzione Di Consonanza Esecutivo E Consiglio Nelle Regioni A Statuto Ordinario

The object of this book is to describe the institutional modifications of the Italian form of state more than ten years after the review of Title V – Part II of the Italian Constitution – for an audience that goes well beyond the Italian national boundaries. The fifteen essays that make up the book discuss the birth and evolution of the Italian regionalism (including those regions with Special Statutes) as well as reforms of 1999-2001. A particular attention is devoted to the role of autonomy in defining regional statutes, regional forms of government, and regulatory and administrative powers. These are subjects on which there is by now an abundant body of constitutional case law, which is extensively referred to by the chapters. The role of the regions vis-à-vis the local bodies and vis-à-vis the European and international order is also discussed, as the right to negotiate with foreign powers has now been conferred on the regions. Lastly, the volume presents contributions on regional finance and on the new law on fiscal federalism, as well as on regional powers in the area of health and welfare.

This consultation document discusses how to deliver a referendum that is legal, fair and decisive. The Scottish Government is aware of the limits of its powers. It acknowledged those limits in 2007. Since the Scottish National Party's success in May 2011, the Scottish Government has provided no new explanation of how it would deliver its manifesto commitment to hold a referendum, despite the limits to its power. The UK Government has therefore considered the proposals put forward by the Scottish Government in February 2010 but those cannot be legally delivered by the Scottish Parliament. The UK Government does not believe that Scotland's constitutional future should be decided in court. The referendum must be legally watertight and that can only be provided by legislation involving the UK Parliament although this can be done in different ways. For the referendum to be fair as well as legal it should be overseen by those who have both the demonstrable neutrality and proven expertise. Finally, for the referendum to be also decisive, it is the UK Government's view that there must be a single, straightforward question; and that question must be asked as soon as possible

This volume examines the relationship between central government and local institutions, taking Italy as a case study to present a comparative perspective on how the Italian experience has influenced the global developments of federal and regional states. As the country with the longest standing regional system, Italy has a lot to tell countries that are dealing with similar issues in present times. Adopting a theoretical/analytical approach coupled with comparative analysis, this volume critically reflects on the changes brought to the Italian system of government by the reform of Title V of the Italian constitution, the reasons why further decentralisation has been resisted and offers a comparative overview of the place and contributions that the Italian experience has brought to the global debate on regionalism and federalism. The book is divided into two parts: Part I distils the essence of the evolution of Italian regionalism and the respective debate before and after 2001. While focusing on Italy, the various chapters situate it within the global framework of discussion. Part II reflects on how the Italian regional constitutional architecture contributes to the global debate, particularly focusing on the main innovations brought about by constitutional reform. The book will be essential reading for researchers, academics and policy-makers working in the areas of constitutional law and politics, and federalism.

Originally published in 1932, bringing together essays that appeared in previous years, and then reprinted in 1949 and 1971 with updates, this book, so far from its first appearance, is of a shocking topicality, such that it can still be used today as a manual for orientation in the Babelic "contemporary spiritualism" of the modern world and to avoid its traps.
