Panasonic Toughbook 34 User Guide

Whether you're a practicing cataloger looking for a short text to update you on the application of RDA to cataloging records or a school librarian who needs a quick resource to answer cataloging questions, this guide is for you. • Thoroughly updates a best-selling, essential guide to cataloging • Addresses the new standards specifically as they apply to school libraries • Helps school librarians understand and implement the new cataloging standards in their collections • Distills the latest information and presents it in a format that is clear and accessible • Fills the need for up-to-the-minute cataloging guidance for the busy librarian who wants information in a hurry

Discusses all aspects of digital video production, from shooting and editing to creating finished movies on disc or tape and streaming on the Web.

UNESCO estimates that eleven percent of primary school–age children—seventy-two million worldwide—are not enrolled in or attending school. Children who do attend may find themselves in schools that lack adequate space, facilities, or resources—impossible situations for learning. It is against this backdrop of profound need that One Laptop per Child (OLPC) emerged in 2005. The mission of the organization is to "empower the children of developing countries to learn." They created the first affordable netbook specifically built to withstand harsh climates and the handling of young children—the bright green and white XO. At the 2005 World Economic Forum, Nicholas Negroponte, the MIT researcher who co-founded the Media Lab and OLPC, introduced the XO laptop to the world and described a new approach to changing education in developing countries.

First, children must have access to information (through low-cost data communications) and the tools to educate themselves (affordable computers and learning software). Secondly, the fundamental approach to education must shift from passive knowledge acquisition to active construction of knowledge (learning how to learn). Thirdly, OLPC planned to build an organization with the capability to deliver these computers and support these shifts globally. It was an audacious vision of how to bring about a massive educational change. Learning to Change the World is the story of One Laptop per Child—a story that will resonate with entrepreneurs and social innovators in any field. OLPC is an example of a non-profit organization with aspirations for systemic change on a global scale, yet wrestling with tough questions that will be familiar to any social entrepreneur: how to ensure market forces support the scale up of a social program; how to balance the need to repeat past successes but still leave room for innovation; how to leverage a network to expand impact beyond your original capabilities; and how to help people without creating dependence. The authors set out to tell the real story of their journey—both successes and failures. For both ardent supporters and critics alike, this book presents both an invitation and a challenge: to set aside preconceived notions about OLPC and read the inside story of the origins and evolution of the organization.
A consumer guide that integrates shopping suggestions and handy user tips as it describes and rates dozens of digital electronic products, including cell phones, digital cameras, televisions, computers, video games, and home theater products.
A resource for information executives, the online version of CIO offers executive programs, research centers, general discussion forums, online information technology links, and reports on information technology issues.

The automotive industry appears close to substantial change engendered by "self-driving" technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.

Rates consumer products from stereos to food processors

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

A one-minute-manager approach to issues, "Socially Responsible IT Management" explains how following each principle can save money or time. With step-by-step instructions on how to accomplish objectives, this book shows readers how to overcome the social crisis that has resulted from the widespread use of information technology.

ARE YOU PREPARED FOR THE LAW ENFORCEMENT IT REVOLUTION? Law enforcement agencies that are laggards in Information Technology (IT) will soon, if not already, be considered mismanaged.

Whether you are in an operational position, or you are a police officer who aspires to a higher rank, you must be aware of how IT can help you perform your job and hel Introduction To SPACES SPACES is a portable, lightweight battery charger and DC power distribution system designed to operate using various sources of DC input power including renewable solar energy. - Using INPUT cables selected by the user, SPACES accepts INPUT DC power in several ways including solar power input, vehicle DC power input, or batteries. - Using optional OUTPUT cables selected by the user, SPACES can function as a battery charger or can directly power 12/24 volt battery operated weapon system. - SPACES is capable of energizing many different types of systems including the AN/PRC-117, AN/PRC-150, AN/PRC-152 radios, Tough Book computers, low wattage AC powered devices and charge BB-2590/U and other batteries. SPACES can also be used as a Power Distribution device enabling the user to transfer energy between different battery types (see page 49). Introduction To Guide to Employing Renewable Energy and Energy Efficient Technologies 1. PURPOSE: This X-File gathers, organizes and synthesizes knowledge gleaned by the Marine Corps Warfighting Laboratory utilizing lessons learned from the Experimental Forward Operating Base (ExFOB) process, and from limited experimentation, pre-deployment training and post deployment reports. It is in a format that can be quickly read and easily transported—in the cargo pocket of the utility uniform—so easy-to-use information is immediately available to all levels of command. 2. SCOPE. This X-File consolidates

knowledge on technologies that were evaluated during the ExFOB process in close cooperation with the Commandant's Expeditionary Energy Office (E2O). These technologies have proven to reduce the logistic footprint of Marines operating from austere operating locations in Afghanistan. a. All of the systems described in here can be found in open access sources. b. We have outlined the capabilities of the technology and clarified how it could be employed. c. We do not replace any Government-issued Technical Manuals nor is this knowledge intended to replace any existing tactical warfighting fundamentals. d. Our goal is to optimize potential use of the technologies in conjunction with established Marine Corps doctrine, orders, and higher level policy guidance. 3. HANDLING INSTRUCTIONS. This X-File is approved for public release; distribution unlimited.

A fully revised, comprehensive guide offers an in-depth exploration of today's recent technological advances, such as digital age filmmaking, while reviewing a collection of new methods and techniques in relation to various film formats and offering suggestions on the business aspects of financing and producing films. Original.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.
